

ADVANCE

SIMULATED ADVANCE — aggregated procurement commitment for the incumbent extruders

The simulated Ministry-grade evidence shows incumbent extruders with spare capacity and an equivalent alloy/temper, while target-profile demand is fragmented across many projects; an aggregated, conditional offtake makes the die, tooling and qualification investment bankable without capital support.

Brownfield priority to test

Test brownfield first; greenfield is not justified from public evidence.

Decision conditions

- No greenfield or financial support recommendation before effective capacity and target specification are resolved.

Kill conditions

- Demand is temporary, re-exported or below efficient scale
- Incumbent expansion already closes the specification-adjusted gap

Next evidence actions

- Saudi tariff-line and invoice description
- Importer/offtaker application and qualification requirements
- Producer grade, application-equivalence and local-availability matrix
- Effective availability, allocation, utilisation, yield, qualification share, backlog and planned outages

Decision conditions

- Aggregate committed project offtake of at least 3.6 kt across the named buyers before the incumbents invest in dies and qualification.
- No financial support is granted; the intervention is procurement coordination only.

Kill conditions

- Committed offtake falls below the die and qualification break-even volume.
- Buyers revert to imported profiles after qualification.

Next evidence actions
