

ADVANCE

SIMULATED ADVANCE — address an information and market-linkage constraint for potassium sulphate

The simulation assumes a specified potassium-sulphate product and resolved technical gates, and identifies missing information and buyer linkage as the binding constraint; route 2 therefore resolves the gap before any higher intervention.

Route not yet determined

No route hypothesis can be preferred from public evidence; resolve the named route evidence before any support decision.

Decision conditions

- No greenfield or financial support recommendation before effective capacity and target specification are resolved.

Kill conditions

- Demand is temporary, re-exported or below efficient scale
- Incumbent expansion already closes the specification-adjusted gap

Next evidence actions

- Importer/offtaker application and qualification requirements
- Effective availability, allocation, utilisation, yield, qualification share, backlog and planned outages

Kill conditions

- The assumed specification demand or product capability is not confirmed.
- Linkage does not change buyer decisions or the project proceeds without it.
